College of Science and Technology
Declaration of Concentration

Computer Science and Technology

The Computer Science concentration is designed to provide students a breadth of background to pursue a wide variety of career opportunities or graduate study. This is the traditional computer science degree.

The Database concentration is designed to provide students a breadth of software development experience with a depth of knowledge in the design, development, and administration of database systems.

The Software Engineering concentration is designed to provide students a breadth of software development experience with a depth of knowledge in the techniques appropriate for the development of large software systems.

The Networks concentration is designed to provide students a breadth of software development experience with a depth of knowledge in the design, development, and administration of computer networks.

Information Science and Systems

The Information Systems concentration is designed to provide graduates with a background in both information technology and business so that graduates can pursue a variety of career opportunities applying, managing, and supporting information technology within profit and non-profit organizations.

The Web Development concentration - Students will take media studies, art, and business courses in this brand new area of concentration which prepares students for jobs in the rapidly growing area of e-commerce.

Completed forms must be turned in to the Advising Center in Stuart Hall
