Community Project Assessment (Conclusion)

To evaluate the contributions our students have made and enhance the quality of the service Radford University renders to local communities, we ask that our community partners complete brief questionnaires prior to the project’s initiation and following its completion. Thank you in advance for your assistance!

1. At the beginning of the term, what goal(s) did you hope the project would achieve?

2. To what extent do you believe that the project was successful in achieving those outcomes?

3. Did you expect the RU student(s) to deliver any “product” (e.g., a summary report, analysis, or presentation?)

   If so, was that product delivered as promised?

   Do you believe that the product you received will be useful for your community/group/organization? In what way(s)?

4. Were the experiences shared by the RU student(s) and members of your community/group/organization professional and positive?

5. What have members of your community/group/organization said about the project and/or the RU student(s) involved in it?

6. If you have another opportunity to partner with RU in this type of endeavor, will you do so? Why or why not?

Name of Community Partner Completing Questionnaire: _______________________________
