

RPEG Design Classes

REGISTER BY JUNE 30

**Taught by Ron McCorkle
Certified Permaculture Designer**

For eight weeks, I will be leading a series of workshops and classes designed to teach some of the design aspect of permaculture. Participants will learn various permaculture principles and use these new skills to work on existing projects in the City of Roanoke.

Some of the principles that will be taught are:

- Observe & Replicate Patterns
- Catch and Store Energy
- Multiple Functions
- Produce No Waste
- Use & Value Renewable Resources
- Sector & Zone Planning
- Relative Location
- Use Edges and Value the Marginal
- Use and Value Diversity
- Integrate Rather than Segregate
- Accept Feedback
- Use Small and Slow Solutions
- Stack & Pack
- Use Appropriate Technologies
- Consider Succession

Permaculture - An ecological design system allowing the regeneration of human habitats.

The Roanoke Permaculture Education Guild is a non profit organization created to teach permaculture principles and apply them in our daily lives.
