

Homework 2 - Study 1 Literature Search
Due Monday 9/11/06
10 points

Below you will find the PsycINFO search history that we developed in class. Repeat this search history so that you get the 21 articles presented in Search 10. Look through these 21 articles and select four articles that you think are most relevant the observational study that we will be conducting. Print the full citation for all four articles, and order the articles through Iliad (unless the pdf is available online, in that case save and print the pdf file - when you save it, remember to give it a meaningful name, e.g., author and year). Turn in the 4 printed Citations and write at the top whether you have ordered the article or whether you have already obtained the pdf file.
