

Debriefing Form

Thank you for participating as a research participant in the present study concerning your gender roles, distress and depression, and hostile and aggressive behavior. The present study tests whether people who endorse masculine gender roles report more hostile feelings and aggressive behaviors. Also, it tests whether people who endorse feminine gender roles are more likely to report feelings of depression and distress.

Again, we thank you for your participation in this study. If you know of any friends or acquaintances that are eligible to participate in this study, we request that you not discuss it with them until after they have had the opportunity to participate. Prior knowledge of questions asked during the study can invalidate the results. We greatly appreciate your cooperation.

If you think you might be suffering from depression we strongly urge you to contact the Radford University Center for Counseling and Student Development in the lower level of Tyler Hall. (540)831-5226. www.radford.edu/~ccsd-web

If you have any questions or concerns regarding your participation in this study, or if you feel that you have been unfairly treated or distressed by participating, please contact Dr. Jeff Aspelmeier (email: jaspelme@radford.edu; telephone: 540 831-5520; Washington Hall B17).

Thanks again for your participation.
