

Economics

Bachelor of Business Administration

Program Objective

The Department of Economics aims to provide contemporary undergraduate and graduate instruction; offers programs and concentrations that meet local, state and national needs; and provides services to the University, profession and community.

The department emphasizes a curriculum that develops the student's oral, writing, critical-thinking, problem-solving and decision-making skills to succeed in a global marketplace. It promotes theoretical, applied, pedagogical and interdisciplinary research while encouraging the faculty to engage in consulting services on domestic and international business and economic issues. The department offers both the Bachelor of Science and Bachelor of Business Administration degrees in economics.

Career Options and Outlook

Economics is the study of choice. Economists seek to understand how we make choices as consumers, producers, citizens and in social settings. A degree in economics can lead to diverse career opportunities and is a gateway to various graduate degree programs, including the MBA and law school. Economists can be found working in business firms, particularly financial and insurance services; economic consulting firms; federal, state and local governments; and nonprofit organizations.
