

Radford University

College of Science and Technology

Goals for 2013-2014

Distributed August 22, 2013

Lead the faculty and staff of the College in developing and delivering educational opportunities of the highest quality possible for students, consistent with the mission of the College.

- Explore efforts to enhance student retention through collaborations with Noel-Levitz and the Radford University Office of Student Retention
- Support development of innovative, collaborative, and alternative learning opportunities
- Support the development of graduate degree and new undergraduate degree program proposals
- Support efforts to achieve American Chemical Society approval for the Department of Chemistry

Lead the College in procuring and managing fiscal, human, and physical resources necessary to accomplish these goals.

- Pursue new relationships with corporate partners and continue to pursue gifts to the CSAT
- Support the efforts of faculty members to achieve a goal of 26 external grant submissions and 13 external grant awards

Represent the College, its goals and needs to other external as well as internal constituencies.

- Continue to communicate with all constituents of the CSAT through the CSAT newsletter and alumni newsletter, CSAT website, CSAT Facebook page and by meeting with departments and faculty members

Promote the overall excellence and welfare of the University.

- Support positive morale among faculty and staff across the CSAT by listening to faculty concerns and soliciting faculty input in decisions affecting the CSAT
- Support efforts to engage alumni in the work of CSAT
- Support efforts to enhance the academic reputation of the CSAT and Radford University
