

**Database Architect
College Internship - Summer 2016**

Requisition Number 15018064

Northrop Grumman Facility, Lebanon, VA

Description:

Northrop Grumman is seeking current college Juniors and Seniors (regardless of age) for its highly competitive internship program. The position will be in our Enterprise Shared Services organization located in Lebanon, Virginia.

The qualified applicant will become part of the Application Services organization, and will work in a dynamic people-focused environment where he/she will interact with users, customers, and other developers. Selected Interns will perform software engineering duties, including evaluate, install and maintain software applications. Responsibilities will also include software development and application administration.

Basic Qualifications:

- Currently enrolled in an accredited college/university degree program pursuing a bachelor's degree in Computer Science, Information Systems, or Engineering related field.
- Have completed at least sophomore year
- Acquainted with Oracle or SQL Server or MySQL; knowledge of Structured Query Language; familiarity with MS Windows or Unix/Linux; understands code migration and database change management
- Be available to work 10-12 weeks this summer for 40 hours a week
- U.S. Citizenship required

Preferred Qualifications:

- GPA of 3.0 or better is preferred
- Proficient in Microsoft Office or equivalent is a plus.
